OVER-RING ELECTRONIC ACCELERATOR

Guidosimplex has been the leader in the mobility equipment industry for over 50 years. Pairing innovative designs with unrivaled technology, Guidosimplex provides stylish and safe mobility solutions.

Refinished in stylish Italian leather – the revolutionary GTS Over Ring Accelerator is easy to use and can be adapted to almost any vehicle with little modification. The GTS accelerator interfaces with your vehicle’s systems providing smooth acceleration and control. Keep both hands on the steering wheel and accelerate by applying pressure on any point of the ring. The GTS accelerator fits over your steering wheel, out of the way as you get in and out of your vehicle, all while maintaining the original safety features of your steering wheel including the airbag.

ELECTRONIC PRECISION & RELIABILITY

Our electronic system produces reliable, precise, and effortless acceleration. Use our exclusive 50% switch to automatically reduce the sensitivity of your accelerator, ideal for use in traffic, steep hills, and pulling into and out of parking spaces. Do you share your vehicle with another driver? No problem! The simple press of a button deactivates the Over-Ring, restoring the original acceleration and allowing all drivers to operate the vehicle. The GTS also has an optional quick release feature that allows you to remove the Over-Ring from the steering wheel with the press of a button.

NEW HEIGHTS IN SAFETY

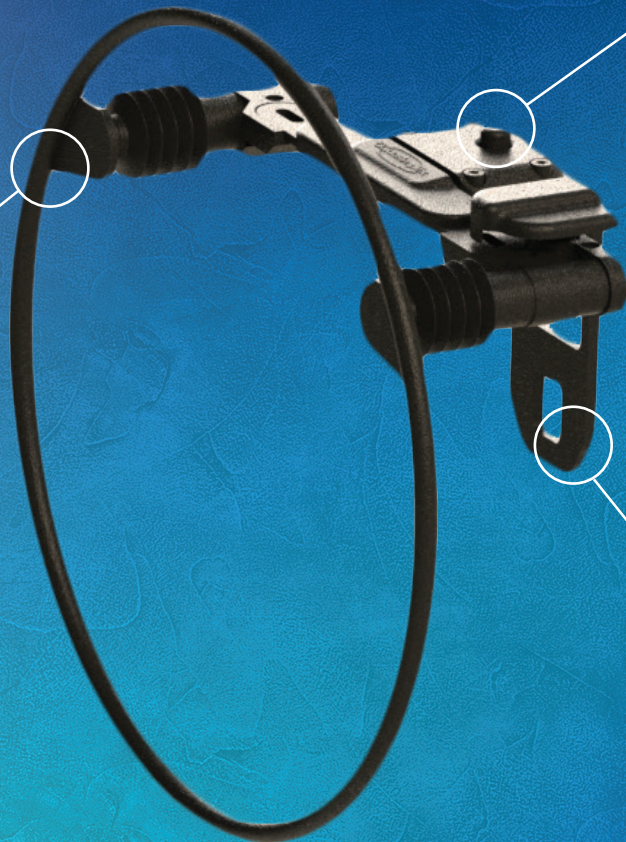

Our mission to provide you with Controls For Life means our products must exceed the highest quality and safety standards. Every feature of the Over-Ring Accelerator was built with your safety in mind. Our exclusive Safe Drive feature prevents acceleration under hard braking. Choose from one of our 907 series brake levers to fit your preferred braking method. Column mounted left hand, right hand, and floor mounted right hand braking systems are a perfect combination with the Over-Ring Accelerator.
